

LATHUSAN SHANMUGANATHAN

Fullstack developer | Software Engineer

☎ +94 0778410323 | ✉ Email | 🔗 LinkedIn | 🐙 GitHub | 📁 Portfolio

Professional Summary

Software Engineering undergraduate with hands-on experience building full-stack web and mobile applications using React, Next.js, Node.js, Express, Laravel, and MongoDB. Developed real-world systems including e-commerce, doctor appointment, and live bus tracking applications. Seeking a Software Engineering or Full-Stack internship to apply strong problem-solving and development skills in real industry projects.

Education

Bachelor of Science (Hons) in Software Engineering

Sabaragamuwa University of Sri Lanka

Aug 2023 – Present

GPA: 3.34 / 4.0

Specialization: Software Engineering

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Application Development, Software Engineering, RESTful API Development, Mobile Application Development, Software Architecture

Diploma in English (DIE)

ESOFT Metro Campus

2023

Diploma in Information Technology (DITEC)

ESOFT Metro Campus

2023

G.C.E. Advanced Level – Physical Science Stream

Kn/Mulangavil/Maha Vidyalayam

Results: B, B, C

2021

Technical Skills

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Laravel, REST APIs

Mobile: Flutter, React Native

Databases: MongoDB, MySQL, PostgreSQL

Programming Languages: JavaScript, Java, Python, C, PHP

Tools: Git, GitHub, Postman, VS Code

Concepts: OOP, DSA, MVC, REST APIs, Software Architecture

Projects

WayGo – Smart Bus Tracking Mobile Application (Capstone Project)

🐙 GitHub

Flutter, Node.js, Express.js, MongoDB Atlas, Google Maps API, Socket.IO, Stripe

- Collaborated in a team project to develop a real-time bus tracking mobile application.
- Contributed to full-stack development including Flutter UI design, REST API integration, testing, and MongoDB database management.
- Implemented real-time location tracking features to display live bus movements and improve user travel experience.
- Designed and integrated RESTful APIs for efficient communication between mobile frontend and backend services.
- Integrated secure online ticket payment functionality using Stripe payment gateway.
- Utilized Socket.IO to enable real-time updates between the mobile application and backend server.

BodyLogic – Doctor Appointment System

Next.js, Node.js, Express.js, MongoDB Atlas

- Developed a doctor appointment booking system with scheduling and user management.
- Built responsive frontend and backend API integration.
- Ensured scalable architecture using MongoDB.

RMS – Result Management System (Community Project Ongoing)

Next.js, React, Tailwind CSS, Node.js, MongoDB

- Developing a comprehensive Result Management System featuring distinct, secure role-based portals for students and administrators.
- Engineering a responsive frontend and building robust backend API routes to handle automated grade uploads, GPA calculations, and real-time analytics.
- Utilizing MongoDB for structured data storage to effectively manage student records, results, and an automated notification system.

Buyzaar – Multi-Vendor E-commerce Platform

React.js, Node.js, Express.js, MongoDB Atlas

- Built a multi-vendor platform for product management and customer shopping experience.
- Implemented JWT authentication and REST APIs.
- Designed scalable backend with MongoDB Atlas.
